NOTICE

All instructions, warranties and other collateral documents are subject to change at the sole discretion of Horizon Hobby, LLC. For up-to-date product literature, visit horizonhobby.com or towerhobbies.com and click on the support or resources tab for this product.

MEANING OF SPECIAL LANGUAGE

The following terms are used throughout the product literature to indicate various levels of potential harm when operating this product:

WARNING: Procedures, which if not properly followed, create the probability of property damage, collateral damage, and serious injury OR create a high probability of superficial injury.

CAUTION: Procedures, which if not properly followed, create the probability of physical property damage AND a possibility of serious injury.

NOTICE: Procedures, which if not properly followed, create a possibility of physical property damage AND a little or no possibility of injury.

 **WARNING:** Read the ENTIRE instruction manual to become familiar with the features of the product before operating. Failure to operate the product correctly can result in damage to the product, personal property and cause serious injury. This is a sophisticated hobby product. It must be operated with caution and common sense and requires some basic mechanical ability. Failure to operate this Product in a safe and responsible manner could result in injury or damage to the product or other property. This product is not intended for use by children without direct adult supervision. Do not use with incompatible components or alter this product in any way outside of the instructions provided by Horizon Hobby, LLC. This manual contains instructions for safety, operation and maintenance. It is essential to read and follow all the instructions and warnings in the manual, prior to assembly, setup or use, in order to operate correctly and avoid damage or serious injury.

Age Recommendation: Not for children under 14 years. This is not a toy.

SAFETY PRECAUTIONS AND WARNINGS

As the user of this product, you are solely responsible for operating in a manner that does not endanger yourself and others or result in damage to the product or property of others.

This model is controlled by a radio signal subject to interference from many sources outside your control. This interference can cause momentary loss of control, so it is advisable to always keep a safe distance in all directions around your model as this margin will help avoid collisions or injury.

- Never operate your model with low transmitter batteries.
- Always operate your model in open spaces away from full-size vehicles, traffic and people.
- Never operate the model in the street or in populated areas for any reason.
- Carefully follow the directions and warnings for this and any optional support equipment (chargers, rechargeable battery packs, etc.) you use.
- Keep all chemicals, small parts and anything electrical out of the reach of children.
- Never lick or place any portion of the model in your mouth as it could cause serious injury or even death.
- Exercise caution when using tools and sharp instruments.
- Take care during maintenance as some parts may have sharp edges.
- Immediately after using your model, do NOT touch equipment such as the motor, electronic speed control and battery, because they generate high temperatures. You may burn yourself seriously touching them.
- Do not put fingers or any objects inside rotating and moving parts, as this may cause damage or serious injury.
- Always turn on your transmitter before you turn on the receiver in the car. Always turn off the receiver before turning your transmitter off.
- Keep the wheels of the model off the ground when checking the operation of the radio equipment.

 **WARNING AGAINST COUNTERFEIT PRODUCTS:** Always purchase from a Horizon Hobby, LLC authorized dealer to ensure authentic high-quality Spektrum product. Horizon Hobby, LLC disclaims all support and warranty with regards, but not limited to, compatibility and performance of counterfeit products or products claiming compatibility with DSM® or Spektrum technology.

CHARGING WARNINGS

⚠ WARNING: Failure to exercise caution while using this product and comply with the following warnings could result in product malfunction, electrical issues, excessive heat, FIRE, and ultimately injury and property damage.

- **NEVER LEAVE CHARGING BATTERIES UNATTENDED DURING USE.**
- **NEVER CHARGE BATTERIES OVERNIGHT.**
- The power supply must deliver power at Safety Extra Low Voltage (SELV).
- Never attempt to charge dead, damaged or wet battery packs.
- Never attempt to charge a battery pack containing different types of batteries.
- Never allow children under 14 years of age to charge battery packs.
- Never charge batteries in extremely hot or cold places or place in direct sunlight.
- Never charge a battery if the cable has been pinched or shorted.
- Never connect the charger if the power cable has been pinched or shorted.
- Never connect the charger to an automobile 12V battery while the vehicle is running.
- Never attempt to dismantle the charger or use a damaged charger.
- Never attach your charger to both an AC and a DC power source at the same time.
- Never connect the input jack (DC input) to AC power.
- Always use only rechargeable batteries designed for use with this type of charger in the correct programming mode.
- Always inspect the battery before charging.
- Always keep the battery away from any material that could be affected by heat.

- Always monitor the charging area and have a fire extinguisher available at all times. Always end the charging process if the battery becomes hot to the touch or starts to change form (swell) during the charge process.
- Always connect the charge cable to the charger first, then connect the battery to avoid short circuit between the charge leads. Reverse the sequence when disconnecting.
- Always connect the positive red leads (+) and negative black leads (-) correctly.
- Always disconnect the battery after charging, and let the charger cool between charges.
- Always charge in a well-ventilated area.
- Always terminate all processes and contact Horizon Hobby if the product malfunctions.
- Charge only rechargeable batteries. Charging non-rechargeable batteries may cause the batteries to burst, resulting in injury to persons and/or damage to property.
- The socket-outlet shall be installed near the equipment and shall be easily accessible.

⚠ WARNING: Never leave charger unattended, exceed maximum charge rate, charge with non-approved batteries or charge batteries in the wrong mode. Failure to comply may result in excessive heat, fire and serious injury.

⚠ CAUTION: Always ensure the battery you are charging meets the specifications of this charger and that the charger settings are correct. Not doing so can result in excessive heat and other related product malfunctions, which can lead to user injury or property damage. Please contact Horizon Hobby or an authorized retailer with compatibility questions.

CHARGE THE VEHICLE BATTERY

Follow the manufacturer's directions for your charger to properly charge the vehicle battery.

⚠ CAUTION: Only use chargers designed to charge the chosen battery type. Using an incorrect charger or incorrect charger settings could cause the battery to catch fire or explode.

OPERATING THE INCLUDED S120 SMART CHARGER (PRO CIRCUIT VERSION, LOS06002 ONLY)

1. Connect the S120 charger to a USB power supply adapter.
2. Connect the Smart battery lead to the IC5 to IC3 adapter.
3. Connect the IC3 adapter to the charge port on the S120 charger.

TIP: The battery can be disconnected from the charger at any time to stop the charging process.

4. Refer to the LED Indicator table for charger status.
5. A red LED will illuminate to indicate abnormal charging. Follow the operation steps to ensure proper connection is used to charge the battery.

IMPORTANT: Non-Smart batteries will cause the LED to illuminate red and the S120 will not recognize or charge the battery.

LED Indicator	
Power On - No Battery Connected	USB 5V/1A, 5V/2A: White LED USB Quick Charge 2.0/3.0: Blue LED

	Less Than 25% Single Flash
	25% - 75% Double Flash
76% - 99% Triple Flash	
Charge Complete	Green LED (Solid)
Firmware Update	Red-Green-Blue Flashing LED
Error	Red LED (Solid)

INSTALL THE TRANSMITTER BATTERIES

This transmitter requires 4 AA batteries (included).

1. Remove the battery cover from the transmitter.
2. Install the batteries as shown.
3. Install the battery cover.

CAUTION: If using rechargeable batteries, charge only rechargeable batteries. Charging non-rechargeable batteries may cause the batteries to burst, resulting in injury to persons and/or damage to property.

CAUTION: Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to national regulations.

INSTALL THE VEHICLE BATTERY

The battery compartment is designed to fit the 5000mAh, 7.4V 2S 50C G2 series LiPo Smart battery with IC5 connector (SPMX52S50H5).

To install the recommended battery:

1. Remove the pin from the battery compartment.
2. Rotate the battery hatch down.
3. Fully insert the battery, label side down, into the battery compartment.
4. Route the battery lead wires forward through the top of the muffler as you rotate the battery hatch closed.

NOTICE: The battery lead wires must be routed over the muffler to ensure they don't contact the rear tire during operation. Failure to do so may cause damage to the wires and electronic components.

5. Press up on the battery hatch.

6. Insert the pin through the hole in the battery compartment post.

TIP: It may require considerable force the first few times to close the battery hatch tight enough to insert the pin.

7. Insert the IC5 battery connector into the vehicle battery port.

POWER ON THE TRANSMITTER

To power on the transmitter press the power button located on the back of the transmitter, as shown. The transmitter will emit a tone and the battery level indicator will briefly flash the transmitter battery level. The LED indicator will then flash yellow.

POWER ON THE VEHICLE

1. Press the power button located on the right side of the vehicle, next to the rider's leg, as shown in the illustration.
2. Place the vehicle on the included stand and leave motionless for at least five seconds, allowing the vehicle to initialize.

The transmitter will emit a pair of descending tones, and the vehicle will emit a series of tones. When the vehicle has initialized, the transmitter will emit a series of tones and the battery level indicator will display the vehicle battery level.

When the vehicle and transmitter are powered on, but the flywheel is off, the transmitter emits a warning tone and flashes the LED indicator yellow. This is to remind you the flywheel is off.

STEERING TEST

Rotate the transmitter steering wheel left and right to test the steering.

IMPORTANT: The front wheel of the vehicle turns the opposite direction from the direction the transmitter steering wheel is rotated.

If the vehicle steering operates with transmitter input, the MS6X and ESC are both armed.

FLYWHEEL STARTUP

The vehicle features a high-speed, motorized flywheel to assist with stability.

To power on the flywheel:

1. Place the vehicle on the included stand.
2. Slide the transmitter flywheel switch to ON. The LED indicator on the transmitter will glow solid green, and the flywheel on the vehicle will start, gradually increasing in speed.
3. Wait for the flywheel to reach maximum speed, approximately 30 seconds, before attempting to drive the vehicle.

TIP: When the flywheel has reached maximum speed, the audible pitch of the spinning flywheel will be constant.

IMPORTANT: Attempting to drive the vehicle without running the flywheel or without waiting for the flywheel to reach maximum speed is not recommended.

TRANSMITTER CONTROLS

THROTTLE AND BRAKE

Pull the transmitter trigger to make the vehicle move forward. The farther you pull the trigger, the faster the vehicle will accelerate.

Push the transmitter trigger forward to apply the brake. The vehicle is equipped with a floating disk front wheel brake and an electronic rear wheel motor brake.

CAUTION: This vehicle is capable of very high speed. Slowing and stopping the vehicle from full speed requires as much as 100ft (30m). Never operate this vehicle around people, animals or property until you are familiar with the space requirements for safe operation. Serious injury or property damage may result.

For the initial runs, we recommend using the transmitter throttle limit switch to reduce the available throttle to 50 or 75 percent power. When you are comfortable with the handling characteristics you may increase the throttle limit to 100 percent to experience the full capabilities of the vehicle.

TURNING

The Promoto-MX uses MS6X technology to translate the transmitter input to a desired lean angle, using the weight of the motorcycle to produce the correct response.

Rotate the transmitter steering wheel left and right to turn the desired direction.

- When the steering wheel is rotated right, the front wheel turns left, shifting the weight to the right and the vehicle leans right, then turns right.
- When the steering wheel is rotated left, the front wheel turns right, shifting the weight to the left and the vehicle leans left, then turns left.

IMPORTANT: The faster the vehicle moves, the more stable it becomes, and the less responsive to steering inputs.

DRIVING

STARTING

1. While holding the transmitter in your left hand, place the vehicle on the ground and hold upright.
2. Pull the throttle trigger slightly to start the vehicle moving forward. Once rolling, the vehicle will remain upright, as long as you maintain a minimum speed.

IMPORTANT: The faster the vehicle moves, the more stable it becomes, and the less responsive to steering inputs.

3. Steer using the transmitter steering wheel.

DRIVING PRACTICE

To help familiarize yourself with the handling of the vehicle, practice turning left and right by driving in a figure-8 pattern. Start by driving at low speed, gradually increasing your speed as you get more comfortable.

Other maneuvers to practice:

- Making turns without allowing the lean bar wheels to contact the ground.
- Low-speed maneuvering to become familiar with the minimum speed at which the vehicle will remain upright.
- High-speed maneuvering
- Full speed to full-stop braking
- Turning under braking

TURNING RADIUS

Similar to a full size motorcycle, the turning radius is dependent on the speed of the vehicle. The faster the vehicle is moving, the less responsive it is to steering input.

TIP: To make tighter turns while at speed, apply the brake to slow down and shift weight to the front wheel, complete your turn, and accelerate away.

DRIVING MODES

The Promoto-MX has three drive modes available:

- **Wheelie mode (three green LED flashes):** Meant for driving on smooth, hard pavement, this mode allows the vehicle to pop high wheelies and balance to maintain them while holding full throttle.
- **On-road mode (two green LED flashes):** Meant for driving on smooth, hard pavement, this mode employs wheelie suppression, which will catch wheelies early, setting the front wheel down and allowing for maximum acceleration.
- **Off-road mode (one green LED flash):** Meant for driving on dirt and grass, this mode has wheelie prevention, which will catch most wheelies and keep the motorcycle from flipping over under acceleration.

To change driving modes:

- Press the top of the drive mode button once to go “up” one mode.
- Press the bottom of the drive mode button once to go “down” one mode.

The transmitter will emit a series of tones and flash the LED indicator a number of times corresponding to the selected drive mode, as shown in the illustration.

If the transmitter does not emit a tone or flash the LED indicator when pressing the button, you have reached the end of the drive mode selections. Press the opposite side of the drive mode button to scroll the other direction through the drive modes.

JUMPING

The Promoto-MX is very capable of off-road riding and jumping. Jumping and landing controllably requires timing, coordination, and most importantly, practice. We recommend starting with small jumps and progressing to larger jumps as you become more proficient.

When jumping, always accelerate up the face of the jump. This will pre-load the suspension and allow for a more stable, predictable attitude through the completion of the jump.

Use the throttle to control the vehicle pitch in the air. Increasing the throttle will cause the front wheel to pitch up. Decreasing the throttle will cause the front wheel to pitch down.

IMPORTANT: Due to the rotational force of the flywheel, the vehicle will pitch down more aggressively in the air than most rc vehicles. Conversely, the vehicle pitches up much less aggressively in the air while applying throttle than other vehicles. Because of this, we recommend against applying brakes in the air after leaving the jump.

The optimum landing attitude is for the rear wheel to contact the surface first while being on the throttle, keeping the weight from transferring to the front wheel. If you are not on the throttle, or if the vehicle lands on the front wheel, the weight will transfer over the front wheel, causing a less controllable landing.

RUN TIME

Run time for the vehicle is approximately 9-12 minutes, depending on your throttle usage and driving style.

The vehicle battery capacity is represented by the Smart battery level indicator on the transmitter. When the battery level drops below normal, a single green LED flashes on the battery level indicator. When the single green LED flashes, recharge or replace the vehicle battery.

If you continue to drive beyond the battery alarm, the low voltage cutoff (LVC) will activate, cutting power to the motor. LVC is a function built into the electronic speed control to protect the battery from over-discharge.

NOTICE: Repeated driving to the low voltage cutoff will damage the vehicle battery and shorten the battery life.

MX START STAND

The Promoto-MX includes a motocross stand to use for racing starts.

To use the MX stand:

1. Place the stand on flat solid ground as shown, with the side supports fully extended.
2. Insert a 5in. 40D nail (included) through the hole in the end of each wing and into the ground.
3. Insert the rear wheel of the vehicle in the stand as shown, pressing the wheel fully into the stand. The stand will hold the wheel firmly.
4. When ready to start, simply press the throttle to drive away.

AFTER YOUR RUN

When you are finished with your run:

1. Slide the flywheel switch to OFF. The flywheel has an electronic drag brake to help slow the flywheel. The flywheel should stop in approximately 30 seconds.

IMPORTANT: The vehicle must be powered on for the flywheel drag brake to function. Leave the vehicle powered ON until the flywheel comes to a complete stop. Without the drag brake, the flywheel may take up to 5 minutes to stop on its own.

2. After the flywheel has come to a complete stop, power the vehicle off by pressing and holding the power button until the orange LED turns off.
3. Power the transmitter off by pressing and holding the power button until the power LED turns off.

4. Disconnect the vehicle battery lead from the motorcycle battery port.

NOTICE: Never leave the battery lead connected to the vehicle when not in use. Damage to the battery or vehicle may result.

5. Remove the vehicle battery.
6. Recharge the vehicle battery or charge to storage level if you are done running the vehicle for the day.

MAINTENANCE

DRIVE CHAIN

The drive chain should be cleaned and lubricated after every running session.

To clean the drive chain:

1. Spray the chain with Nitro RC Car Cleaner (DYN5505) or other plastic and electronics-safe cleaner.
2. Wipe the chain with a clean cloth and allow to dry thoroughly.
3. Repeat the above steps until no dirt or grease appears on the cloth.
4. Lightly apply the included chain oil to the roller portion of the chain links, working around the entire chain.
5. Spin the rear wheel to work the oil fully into the chain.
6. Wipe away any excess oil with a clean cloth.

TIP: After the included chain oil is spent, LOS77002 Chain Lube or a “dry” bicycle chain lube may be used to lubricate the drive chain.

DRIVE CHAIN TENSION

As the vehicle is driven more, the drive chain will seat with the sprockets and possibly wear some. As this happens, it may become necessary to adjust the chain tension. The Promoto-MX includes a chain tension adjustment set.

To check the chain tension:

1. Press down on the top side of the drive chain, approximately half way between the front and rear sprockets.

TIP: When correctly tensioned, the chain should be as taut as possible without causing any tight spots as the rear wheel is rotated.

2. If the chain contacts the top of the trailing arm, adjust the chain tension tighter by changing the rear axle spacer pill +.25, as described below.

To adjust the chain tension:

1. Remove the M4 nut from the rear wheel.
2. Pull the M4 axle out of the rear wheel and trailing arm.
3. Move the rear wheel out of the way.
4. Press the rear axle spacer pills out of the trailing arms.
5. The spacers pills are marked with a zero or a number and arrow to show the distance and direction from the zero position the spacer will move the axle. The pills installed at the factory may vary.

Always install the spacer pills as a matching set, with the hole toward the rear of the trailing arm. Select the appropriate spacers and insert them into the trailing arms, ensuring they are oriented in the correct direction.

6. Install the rear wheel, ensuring the chain is installed around both the front and rear sprockets.
7. Install the M4 rear axle and M4 nut.
8. Rotate the rear wheel to ensure it rotates freely.
9. Re-check the chain tension.

LEAN BAR WHEEL ADJUSTMENT

The lean bar wheels on the Promoto-MX may be adjusted up and down to suit the terrain and your driving experience level.

- The stock position is good for general running off-road in dirt or grass.
- Raise the lean bars for running on pavement, to allow for greater lean and tighter turning.
- Lower the lean bars for less experienced drivers running off-road. Having the lean bars lowered allows for easier starting from a stop, as the motorcycle will “stand up” when power is applied while leaning on the lean bar wheels.

To adjust the lean bar wheels:

- Using a 2mm hex driver
 - turn the adjustment screw in to raise the lean bar wheel.
 - turn the adjustment screw out to lower the lean bar wheel.

FORK TOOLS

Use the fork tools to grip the flats on the fork sections as shown.

- The tube requires the 9mm end.
- The end fitting requires the 6mm end.

IMPORTANT: When re-assembling the fork tube, the end fitting should be tightened to 12Nm.

LIMITED WARRANTY

What this Warranty Covers

Horizon Hobby, LLC, (Horizon) warrants to the original purchaser that the product purchased (the "Product") will be free from defects in materials and workmanship for a period of 2 years from the date of purchase.

What is Not Covered

This warranty is not transferable and does not cover (i) cosmetic damage, (ii) damage due to acts of God, accident, misuse, abuse, negligence, commercial use, or due to improper use, installation, operation or maintenance, (iii) modification of or to any part of the Product, (iv) attempted service by anyone other than a Horizon Hobby authorized service center, (v) Product not purchased from an authorized Horizon dealer, or (vi) Product not compliant with applicable technical regulations or (vii) use that violates any applicable laws, rules, or regulations.

OTHER THAN THE EXPRESS WARRANTY ABOVE, HORIZON MAKES NO OTHER WARRANTY OR REPRESENTATION, AND HEREBY DISCLAIMS ANY AND ALL IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE PURCHASER ACKNOWLEDGES THAT THEY ALONE HAVE DETERMINED THAT THE PRODUCT WILL SUITABLY MEET THE REQUIREMENTS OF THE PURCHASER'S INTENDED USE.

Purchaser's Remedy

Horizon's sole obligation and purchaser's sole and exclusive remedy shall be that Horizon will, at its option, either (i) service, or (ii) replace, any Product determined by Horizon to be defective. Horizon reserves the right to inspect any and all Product(s) involved in a warranty claim. Service or replacement decisions are at the sole discretion of Horizon. Proof of purchase is required for all warranty claims. SERVICE OR REPLACEMENT AS PROVIDED UNDER THIS WARRANTY IS THE PURCHASER'S SOLE AND EXCLUSIVE REMEDY.

Limitation of Liability

HORIZON SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY, REGARDLESS OF WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, TORT, NEGLIGENCE, STRICT LIABILITY OR ANY OTHER THEORY OF LIABILITY, EVEN IF HORIZON HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. Further, in no event shall the liability of Horizon

exceed the individual price of the Product on which liability is asserted. As Horizon has no control over use, setup, final assembly, modification or misuse, no liability shall be assumed nor accepted for any resulting damage or injury. By the act of use, setup or assembly, the user accepts all resulting liability. If you as the purchaser or user are not prepared to accept the liability associated with the use of the Product, purchaser is advised to return the Product immediately in new and unused condition to the place of purchase.

Law

These terms are governed by Illinois law (without regard to conflict of law principals). This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. Horizon reserves the right to change or modify this warranty at any time without notice.

WARRANTY SERVICES

Questions, Assistance, and Services

Your local hobby store and/or place of purchase cannot provide warranty support or service. Once assembly, setup or use of the Product has been started, you must contact your local distributor or Horizon directly. This will enable Horizon to better answer your questions and service you in the event that you may need any assistance. For questions or assistance, please visit our website at www.horizonhobby.com, submit a Product Support Inquiry, or call the toll free telephone number referenced in the Warranty and Service Contact Information section to speak with a Product Support representative.

Inspection or Services

If this Product needs to be inspected or serviced and is compliant in the country you live and use the Product in, please use the Horizon Online Service Request submission process found on our website or call Horizon to obtain a Return Merchandise Authorization (RMA) number. Pack the Product securely using a shipping carton. Please note that original boxes may be included, but are not designed to withstand the rigors of shipping without additional protection. Ship via a carrier that provides tracking and insurance for lost or damaged parcels, as Horizon is not responsible for merchandise until it arrives and is accepted at our facility. An Online Service Request is available at http://www.horizonhobby.com/content/service-center_render-service-center. If you do not have internet access, please contact Horizon Product Support to obtain a RMA

number along with instructions for submitting your product for service. When calling Horizon, you will be asked to provide your complete name, street address, email address and phone number where you can be reached during business hours. When sending product into Horizon, please include your RMA number, a list of the included items, and a brief summary of the problem. A copy of your original sales receipt must be included for warranty consideration. Be sure your name, address, and RMA number are clearly written on the outside of the shipping carton.

NOTICE: Do not ship Li-Po batteries to Horizon. If you have any issue with a Li-Po battery, please contact the appropriate Horizon Product Support office.

Warranty Requirements

For Warranty consideration, you must include your original sales receipt verifying the proof-of-purchase date. Provided warranty conditions have been met, your Product will be serviced or replaced free of charge. Service or replacement decisions are at the sole discretion of Horizon.

Non-Warranty Service

Should your service not be covered by warranty, service will be completed and payment will be required without notification or estimate of the expense unless the expense

exceeds 50% of the retail purchase cost. By submitting the item for service you are agreeing to payment of the service without notification. Service estimates are available upon request. You must include this request with your item submitted for service. Non-warranty service estimates will be billed a minimum of 1/2 hour of labor. In addition you will be billed for return freight. Horizon accepts money orders and cashier’s checks, as well as Visa, MasterCard, American Express, and Discover cards. By submitting any item to Horizon for service, you are agreeing to Horizon’s Terms and Conditions found on our website http://www.horizonhobby.com/content/service-center_render-service-center.

ATTENTION: Horizon service is limited to Product compliant in the country of use and ownership. If received, a non-compliant Product will not be serviced. Further, the sender will be responsible for arranging return shipment of the un-serviced Product, through a carrier of the sender’s choice and at the sender’s expense. Horizon will hold non-compliant Product for a period of 60 days from notification, after which it will be discarded.

FCC INFORMATION

Contains FCC ID: BRWKATY1T FCC ID: BRWSPMSR6300PM

This equipment complies with FCC and IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and/or antenna and your body (excluding fingers, hands, wrists, ankles and feet). This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

SUPPLIER'S DECLARATION OF CONFORMITY

LOSI Promoto-MX RTR (LOS06000, LOS06002)

FC This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are

designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

IC INFORMATION

CAN ICES-3 (B)/NMB-3(B) CONTAINS IC: 6157A-KATY1T IC: 6157A-SPMSR6300PM

This device contains license-exempt transmitter(s)/receivers(s) that comply with Innovation, Science, and Economic Development Canada's license-exempt RSS(s).

Operation is subject to the following 2 conditions:

1. This device may not cause interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.

COMPLIANCE INFORMATION FOR THE EUROPEAN UNION

CE EU COMPLIANCE STATEMENT:

LOSI Promoto-MX RTR (LOS06000); Hereby, Horizon Hobby, LLC declares that the device is in compliance with the following: Radio Equipment Directive (RED) 2014/53/EU; RoHS 2 Directive 2011/65/EU; RoHS 3 Directive - Amending 2011/65/EU Annex II 2015/863.

LOSI Promoto-MX Pro Circuit RTR (LOS06002); Hereby, Horizon Hobby, LLC declares that the device is in compliance with the following: Radio Equipment Directive (RED) 2014/53/EU; Low Voltage Directive (LVD) 2014/35/EU; 2014/30/EU EMC Directive; RoHS 2 Directive 2011/65/EU; RoHS 3 Directive - Amending 2011/65/EU Annex II 2015/863.

The full text of the EU declaration of conformity is available at the following internet address: <https://www.horizonhobby.com/content/support-render-compliance>.

NOTE: This product contains batteries that are covered under the 2006/66/EC European Directive, which cannot be disposed of with normal household waste. Please follow local regulations.
